

# Joining Secondary Education Parent Information

\*There are three grounds on which a school can reject a student:

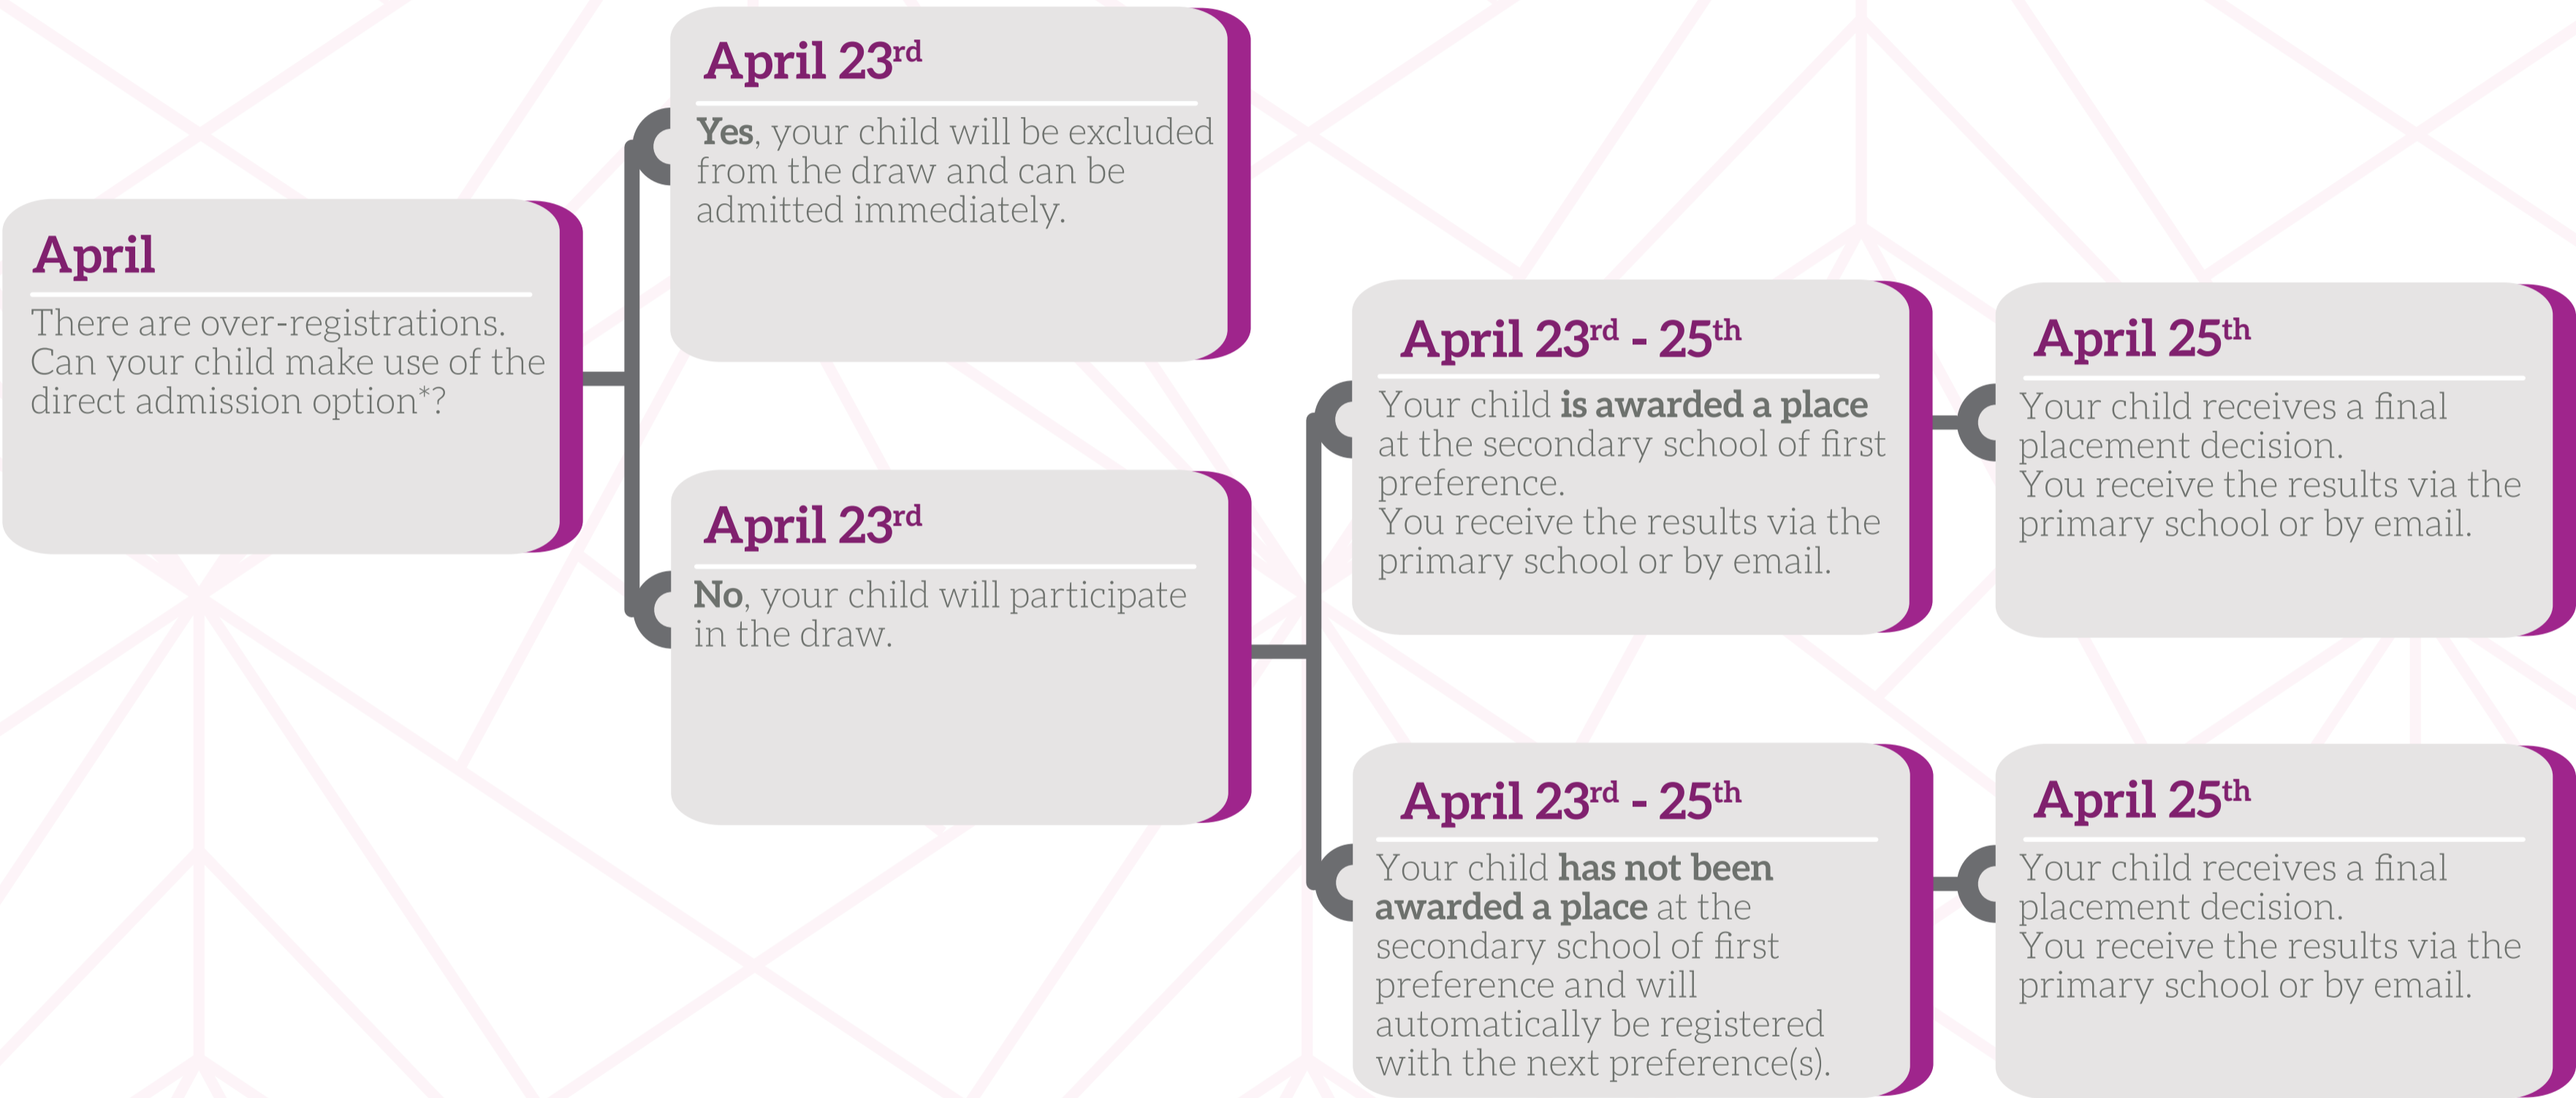

1. The primary school's recommendation does not correspond to the level of education offered by the secondary school.
2. The education and support offered by the school of registration is not sufficient for the additional educational support a student needs.
3. The student does not meet the additional admission criteria, as determined in advance and announced by this school.

# Route to take in case of over-registration

## What to do in case of over-registration?

If a school has more registrations than places at the educational level for which students have registered, a draw will be held among the students who are eligible for that educational level. Students living in the municipality of Stichtse Vecht have priority, but this only applies to the first preference. The draw categories are multiple (with the exception of the single vwo<sup>2</sup> recommendation) as are, expectedly, most level recommendations. In the case of a single recommendation, students are drawn in the draw category that considers the single recommendation as the lowest recommendation, for example, students with a tl<sup>3</sup> recommendation are drawn in the tl-havo<sup>4</sup> category. For a possible placement in Stichtse Vecht, it is recommended to put at least two schools from Stichtse Vecht on the preference list for vmbo-bbl<sup>5</sup>, vmbo-kader<sup>6</sup>, vmbo-tl<sup>7</sup>, havo<sup>8</sup> and vwo level. However, if a school with a placement guarantee is on the list (an overview of schools with a placement guarantee can be found on the secondary education (vo) website no later than October 13<sup>th</sup>), it does not matter how many schools in total are on the list.

\* There are two grounds on which a school can admit a student directly:

1. Students with specific support needs. In exceptional cases, a secondary school may decide to exempt a student with specific support needs from the draw.
2. Students for whom a deferred placement decision applies. For some students, the secondary education department needs a longer period to determine whether the school can meet the student's support needs. In that case, schools can extend the registration period from 6 weeks to 10.
